

International Snubbing Services

ISS has a long history in the hydraulic workover/snubbing business and is the only company in the industry that maintains custom-built equipment for both well control and workover applications. This equipment has been specifically designed to handle extreme and hazardous well conditions, even in the most remote of locations.

The ISS line is the finest contemporary equipment available anywhere in the world.

- 120K Snubbing Unit Hydraulic Series
- 150K Snubbing Unit Hydraulic Series

As a result of our investments, efforts and innovative solutions, ISS is the only company able to supply all equipment required to perform well intervention projects. When ISS provides all of the equipment for a job, it also takes on all of the responsibility for downtime. This offers our customers single point accountability thereby reducing the overall cost of the job. In addition, ISS has the best reputation in the industry for keeping its equipment up and running.

Our vastly experienced team is trained to the highest level of certification and are multi-national and multi-lingual. ISS' outstanding safety record is testimony to the level of commitment we place on working efficiently and safely.
